Strategic Leadership Development Program

Shift your focus from day-to-day tasks to thinking more strategically while becoming a more effective, resilient and dynamic leader.

Strategic leadership is the ability to articulate a clear vision for your organization and to motivate and persuade others to acquire that vision. Strategic leaders are able to build strong yet flexible organizational structures, allocate resources effectively, find ways to encourage innovation, coach and support emerging talent, and execute organizational change.

Running from November 2023 to June 2024, this program blends self-directed online modules with live, interactive online workshops. Program themes alternate between strategic and leadership topics. Content is taught through cutting-edge cases, virtual group simulations and interactive class discussions. Throughout the program new skills, knowledge and behaviours are learned and applied through immediate integration in the workplace. You will practice creating and implementing strategy, leading hybrid teams, making effective decisions, understanding the impact of global events on you and your organization, and leading through turbulent and uncertain times.
